

team treehouse: java objects

- the more you can write your code so someone can just look at it and understand what is going on
 - * this is what mastery of language is
 - * **always strive** for **clarity**

developer acronyms

- **YAGNI** - *you ain't gonna need it*
- **KISS** - *keep it simple stupid*
- **RTFM** - *read the friendly manual*

method signatures

- what makes **methods unique** in *java* are **name** and the **parameters**
 - * this together make up what is known as **method signature**
